

CATAFOR 100M

Masking product for cataphoretic lacquer

Colour : **Light blue**

Use : **Dispenser**

CATAFOR 100M is a special masking agent for cataphoretic paint, aimed at obtaining a two-color over the object to be treated. It is easy to use with a fast-drying dispenser. It is supplied ready for use and can be manually removed by the operator.

Operating conditions

Parameter	Average suggested value	
Application	By dispenser	
Temperature	room	15-30°C
Drying time	In relation to the thickness	10-30 min
Dilution	Not necessary	
Removal	Manually removed by the operator	

Maintenance of plating bath

Keep close properly to avoid fast drying. To increase the fluidity, dilute by 2% with ammonium hidroxide..

Safety Information

Please refer to the safety data sheets for any information regarding safety and disposal (MSDS).
