

### RODINOR 124

RHODIUM FOR PLATING BATH

Colour : **White**

Use : **Bath**

Colour coordinates : **L:90.2**

**a:1.2**

**b:1.8**

#### Product description

RODINOR 124 easy to use, concentrate ,white and shiny rhodium plating characterised by a wide range of working conditions and high strength against pollution. Suitable for any use with white and shiny characteristics in line with the best rhodium plating on the market. RODINOR 124 is the ideal choice for quality rhodium plating without compromise.

#### Operating conditions

Parameter	Average suggested value
Deposition time	40 seconds
Temperature	40 °C
Voltage	4.0 V
Current density	4.0 A/dm <sup>2</sup>
Cathodic efficiency	4 mg/Amin
Deposition speed	0.2 u/min
Anodes	Ti/Pt net
Agitation	Moderate
Ventilation	Necessary

#### Maintenance of plating bath

For small plating solution volumes ( up to 10 litres ) we suggest to use the bath without replenisher . For higher volumes we suggest to use the related replenisher composing the bath:

- **RODINOR 125R**,add 8 ml every 100 Amin.
- **RODINOR 120RA**,add after analysis.

#### Safety Information

Please refer to the safety data sheets for any information regarding safety and disposal ( MSDS ).

### RODINOR 124

RHODIUM FOR PLATING BATH

Colour : **White**

Use : **Bath**

Colour coordinates : **L:90.2**

**a:1.2**

**b:1.8**

#### Preparation of the galvanic bath

In order to prepare 2 L of ready to use solution is necessary following the right steps :

1. Arrange the working tank switching on the ventilation and all the safety devices.
2. Add 1 bottle of RODINOR 124 containing 4g/100ml
3. Add 1900 ml of demineralised water and mix
4. Set the right working temperature
5. Wait till the working temperature and start with plating operation.
